PROFESSIONAL SUMMARY

I am a detail focused developer with 3.5 + years experience in building complex & performant products with great design and feel. Rich experience in leading & driving complex development activities with cross-functional teams performing agile development with TDD, BDD, SCRUM, pair programming, continuous integration and continuous delivery(CI CD). Extensive knowledge of Clean Code Practices, Web Architecture, system design, design principles and design patterns.

CARRIER HIGHLIGHTS

- Lead the development of "Kroger Fresh", an online food ordering website. Delivered the app in 2.5 months time with stellar feedback and comments.
- Spearheaded the development & improvement for kroger.com using JS, CSS & HTML Performance Optimisations leading to decrease in loading time of complex pages from 7-8 secs to 3-4 secs.
- Lead the frontend development of integrated suite of applications for J&J, USA by creating a reusable Angular Component Library leading to a recorded decrease in new development effort by 30-40%.

EXPERIENCE

03/2019 - Present **Thoughtworks** (UI Consultant)

- Leading the UI effort to build and improve web platform for e-commerce giant in USA focussing on UX and accessibility aspect of the webapp, also focussing on documentation.
- Extensively using React JS, hooks, Redux, semantic HTML5, CSS3, KoaJS for BFF, JEST, React Testing Library (RTL), Enzyme, BabelJS, react-styleguidist and Webpack for development.
- Used Gitlab CI and docker for creating and deploying containers to production servers (PCF)

09/2017 - 03/2019 **Software AG** (UI Developer)

- Created reusable components using React, Redux, Angular 2+, Figma and BabelJS transpiler which reduced development time and effort of various teams across multiple projects.
- Implemented modern, responsive and user-friendly web interfaces through on time sprint deliverables in Agile environment focussing on DevOps, UI & UX. Used Flexbox & BEM.
- Extensively used Angular, React, ExpressJS, Node.js, MongoDB as the technology stack.
- Facilitated and led brainstorming sessions with key stakeholders.

08/2016 - 08/2017 **Shuddhi** (Remote Freelance Developer)

- Designed and developed Android Application for Shuddhi with REST API and Database using Java, Express JS, mongoose and MongoDB.
- Turned the Shuddhi's official website responsive with CSS modules & media queries.

EDUCATION

2013 - 2017 **Guru Nanak Dev University, Amritsar, India**
Bachelor's Degree in Electronics and Communication Engineering (7.45)

SKILLS

React, Redux	<div></div>	JavaScript(ES5, ES6 +)	<div></div>
HTML 5	<div></div>	NodeJS (Koa/Express)	<div></div>
CSS 3/SASS	<div></div>	Angular/TypeScript	<div></div>
JEST & RTL	<div></div>	MySQL, MongoDB	<div></div>
Java	<div></div>	Docker, Nginx	<div></div>
